

Science

We will be learning about the Earth, Sun and Moon and how these influence our calendar. We'll also be exploring our solar system. We will conduct some experiments to investigate the relation between the sun, earth, night and day.

ART

We are going to be developing our skills with painting, charcoal and Marbling inks to create a class collage of the Planets, Moon and Sun.

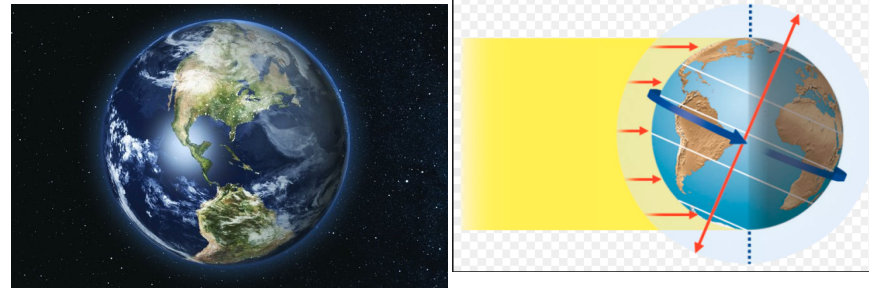

English

We will be exploring space based texts including performance poetry. The children will be writing and performing their own space poems!

Mathematics

We will be developing the children's knowledge of multiplication and division through the teaching of fractions.

The Earth and Beyond!

Computing

We will be learning to program and then creating our own game set in space.

Music

We will be listening attentively and reflecting on space music. We will then compose our own piece.

PE

The children will be developing their dance skills for three weeks. They will also be training as astronauts to ensure their fitness levels are ready for a space mission.

RE

We will be asking why do some people think Gods exist? We will then be asking why do some people go to a place of worship?

WOW Day

Thursday 10th January 2019

Children will be dressing up as astronauts or aliens. We will be completing activities all to do with Space and rockets!

French

We will be learning how to say and order 'les planètes' in French. The children will be describing the planets using adjectives in compound
