

English

We will be reading and studying the London Eye Mystery by Siobhan Dowd as well as the novel Trash by Andy Mulligan use both of these as a stimulus for our writing.

Science

During this term, we will further develop our understanding on interdependence, adaptation and evolution. We will also be looking at the classification of living things.

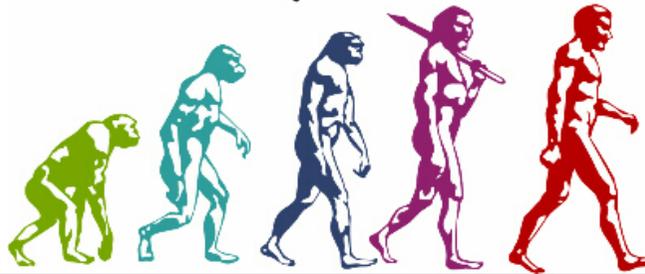

Mathematics

Children will explore maths concepts linked to a story and will further develop their understanding of place value, decimals and written methods for the four operations.

Geography

Using Dartmoor as a basis for our geography study, we will be using maps to apply our knowledge of compasses, grid references and symbols, as well as learning how to use ordnance survey maps.

The Theory Of Evolution

Key facts to be learnt at home

- Learn 5 Ordnance Survey map symbols.
- Be able to classify 6 animals as vertebrates or invertebrates.

Computing

The children will be learning how to stay safe when using technology.

French

We will be revising the days of the week and learning about Notre école, including how to say which subjects we like and prefer. We will be using spoken language to have conversations and be able to write sentences on this topic.

Music

We will be exploring rhythm and melody through singing (if possible) and performing the song 'Happy' by Pharrell Williams.

PE

In outdoor PE, pupils will be learning skills for Invasion Games - Hockey and Soccer.

There will also be a focus on the importance of the warm up and its role in exercise.

Wow Day - This will be confirmed once we have more information about Stone Farm and visitors in school.

PSHE

We will address 'Being Me in My world' and will identify goals for the year ahead.

RE

We will be exploring the key question: Is it better to express your beliefs in arts and architecture or in charity and generosity?
