

French
We will be learning different greetings.

Mathematics
Adding and subtracting 1 and 2 digit numbers. We will also be learning to count in 2s, 5s and 10s (which is also part of our Home Learning) and reading scales using this knowledge. We will then think about 3D shapes and also measuring time.

Science
We will be exploring different materials and their properties. We will also group and sort them. We will carry out investigations to find out which material would be best to use for our rockets.

Computing
We will be creating digital media through use of the programme Paint. It would be great if the children had an opportunity over the holidays to practice on a keyboard.

English
We are writing newspaper reports focussing on past tense verbs and the suffix -ed. We will be thinking about question marks and exclamation marks and will be writing a story based on Whatever Next.

R.E
In RE we are exploring Christian beliefs including prayers, celebrations and extracts from the bible.

WOW Day
Friday 15th January
We would like the children to come to school dressed as an astronaut or alien ready for an adventure into space. The children will be making a rocket ship thinking about how suitable each different material is.

PE
Swift will continue to work with the children on their PE skills.

PSHE
We will be thinking about goals and ambitions.

History
We will be learning about famous astronauts who have contributed to national and international achievements and writing a Tim Peake fact file.

Art
In art this term we are exploring paint. We will be mixing colours and trying to make different textures based on some of our favourite stories.
