

Physical Development

At home and in school we will be continuing to work with SWIFT sports coaching to play games and investigate how our body moves. When we return to school we hope to start using apparatus in gymnastics.

Personal, Social and Emotional Development

We will be encouraging children to confidently try new activities and say why they like some activities more than others. In PSHE we will be thinking about making healthy choices, eating healthily, exercising, keeping ourselves and others safe and having healthy relationships and thinking of the perspectives of others.

Communication and Language

We will be looking at non-fiction books. We will listen to and talk about non-fiction books to develop a deep familiarity with new knowledge and vocabulary. We will use this new vocabulary in our everyday language.

Understanding the world

We will be learning about and exploring different places around the world. We will be comparing our own country to others, noticing similarities and differences. We will be looking at recycling and ways we can look after our planet. We will look at the world map as well as maps of our local area and use them to find our route from home to school. We will think about the changing of the season.

On The Move

Children's Questions

Where do giraffes live?
Are there polar bears in the mountains?
Where is Africa?
How do aeroplanes fly?

Expressive arts and design

The children will sing songs and make music from a variety of cultures. They will also continue to develop their drawing and painting skills, focusing on using the correct colours. If we're back at school we'll encourage the children to work together collaboratively on projects.

Literacy

We will be looking at books that are set in different environments around our world. We will be developing our independence in writing and our writing stamina. We will start learning the skill of reading and checking our own writing and editing to improve it.

WOW day- Wednesday 31st March

Come to school dressed up as a holidaymaker! We're going to celebrate everything we've learnt this term.

The details of this day will be COVID dependant so we will update you with more information closer to the time.

Numeracy

We will start to look at doubling and halving numbers. We will also be revisiting and investigating comparing amounts and using language such as more and fewer. We will then move on to looking at measure and the equipment that we can use to look at capacity, weight and length.
